

## THE GREEN HEART AND THE PRIME MINISTER

“We live in Marloes and recently met the Prime Minister. Mason (6) and Indie (3) created a green heart using green toys at home, this was a project set up by the climate coalition called ‘show the love’ an event to raise awareness of climate changes. Coastlands school joined in and sent a letter home. Mason & Indies photo of their green heart was put on schools twitter and the climate coalition noticed it! It then got shortlisted and invited to parliament for the awards ceremony, we attended on Tuesday 13th March. We were runners up. But then the prime minister unexpectedly arrives! And her people ask to have a photo taken with mason and indie as they were very impressed at two young people being involved and coming all the way to London.

We all had an amazing time and saw some sights of London!”
